👤 PROFILE

Enthusiastic for the cloud. I create and maintain CI/CD pipelines and cloud infrastructure using tools such as Azure Pipelines, Pulumi, and Terraform. Regularly learning new technologies and developing my professional and personal skills is something I enjoy. Constantly getting certified in cloud technologies is a personal goal. I consider myself a very responsible and committed person with what I do, and giving the best in everything I do is a commitment to myself. In my Medium blog, I enjoy sharing the knowledge I have acquired to contribute to the tech community. I'm always happy to receive feedback to improve professionally, as well as personally.

💼 EMPLOYMENT HISTORY

DevOps Engineer at First Factory
November 2019 — Present

Provisioning and maintaining resources in the Azure Portal and AWS. As well as creating CI/CD pipelines in Azure DevOps for Azure Web Apps, AKS, ECS, and other cloud services. Constantly researching for best practices in security, availability and resiliency.
